

THE FARMER'S DAILY

Thursday, 03 September 2026 | Issue 01 | New Delhi

Smart irrigation and soil health lead the season

Practical farm knowledge, policy updates and market signals for Indian farmers.

This issue brings together field-ready guidance for a resilient kharif season.

Farm advisory

- Test soil before the next crop cycle.
- Prefer drip irrigation for water-intensive plots.
- Keep input records for better farm budgeting.
- Use certified seed and follow local advisories.

Policy watch

- Track crop insurance enrolment deadlines.
- Check official portals for scheme eligibility.
- Compare mandi prices before dispatch.
- Keep your Kisan Credit Card documents updated.

In this issue

- 01 Climate-smart farming for changing rainfall patterns
- 02 How farmer groups can improve collective selling
- 03 A simple guide to soil testing and nutrient planning
- 04 Market checklist: grading, storage and transport

Market and technology brief

Digital tools are making farm decisions easier to plan and measure.

Use local weather information, verified advisories and market data together.

For scheme applications, use only official portals and keep acknowledgements safe.

Editor's note

Krishi Manthan brings practical information closer to the people who grow, feed and sustain our communities. Explore the portal for fresh agriculture news, government schemes, events, resources and market updates.
